

## MARENO 700 Range

The 700 range might be small, but it works just like the big ones!

The 700 range is the ideal kitchen solution for those faced with major demands and limited space. It lacks nothing, is versatile and highly reliable: just the credentials needed to satisfy the productivity, quality and service requirements of the most demanding customers. It is unrivalled in its class: with 79 different fitting possibilities, it enables a truly personalised solution and allows even the smallest spaces of the kitchen to be used to their full potential. Thanks to ergonomic design and the quality of manufacturing materials used, the 700 range offers guaranteed power, maximum functionality and superb durability.

The 700 range is: the most reliable range: generous distribution of AISI 304 78170, Stainless steel, select functional components; rugged steel casts; vitreous enamelled steel in areas where grime can carbonise.

The most complete, functional range: perfectly fitting joints; top shelves on the same level; rounded edges; low-profile flues; pressed steel tops with recessed profile; completely closed rears.

The most practical range: with the same front module and overall design, it can be composed in line, back-to-back and overhead, with all the 900 range components, to make up any of a remarkable number of configurations.
