

BERKEL

Always The Original

Berkel 900 Series Semi Automatic Slicer Model 932

- Model 932 is a simple electronic control model; with an ergonomic design and easy operation.
- This slicer is constructed from stainless steel, are fully CE and GS compliant.
- The carriage is either moved backward or forward automatically or the automatic drive of the carriage can be disengaged for manual operation.
- 330mm Stainless steel knife.
- Knife remover (supplied with machine) provides robust use, and easy, safe, hygienic and thorough clean down.
- Two separate motors drive the knife and carriage, reducing wear on a single motor, and ensuring good slice performance as the knife rotates before the carriage is driven.
- Variable slicing speeds of 25 – 55 slices per minute ensures the right speed is selected to guarantee the best possible quality slices.
- Ideal for independent retail food outlets, supermarkets and hypermarkets, food service, and semi-industrial processors for slicing cooked or cured meats, cheese, vegetables, and fruit where more automation is required compared to manual slicing in order to minimize investment and costs.

Model	932
Overall dimensions (mm)	720 x 790 x 620H
Foot print (mm)	420 x 460
Max. cutting size (mm)	320 x 220 H
Slice thickness (mm)	0-25
Diameter of blade (mm)	330
Sound level	< 70 db (A)
Electrical	230 V 50, Hz 1Phase
Power	0.6 kW
Weight	66 kg
Options	-400 V 50 Hz 3 phase, 230 V 60 Hz 1 Phase -Teflon coated
