

Berkel 1898 Traditional Flywheel Slicer Model B3

- The slicer B3 is carefully made with passion by a fully hand-made manufacturing process, which is proudly acquired over time and very few people are able to follow nowadays.
- Every unit is a unique piece and requires a very long time to be hand-crafted.
- The B3 is the ideal slicer for elegant restaurants, for collectors and anyone who loves good taste and genuine flavours.
- In addition to the classic Berkel Red colour, customers can choose other colours: classic creme, black or any other desired colour for complete personalization. It is even possible to add a personalized brass plate on the machine: this would identify your slicer as a real unique piece.
- A slicer stand is available as option for all versions.
