

## 650 Watt Under Countertop Incogneeto Induction Buffet MB062-U

An amazing piece of equipment! See a stone counter-top “magically” become a heated buffet table!

The CookTek® Incogneeto™ induction buffet warmer is designed to be installed directly under stone or engineered stone counter tops.

Like magic a beautiful piece of stone topped furniture can transform into a buffet warmer, capable of holding food accurately to within +/-2°F (+/-1.2°C).

The unit mounts on a rail system underneath the counter. The rail system is screwed into narrow plywood strips, which are glued onto the stone, or stone’s backing. No drilling or cutting of the stone is required!

Each unit comes with enough track to mount in a static location, but longer track kits available (48” / 1.2m lengths), which allow the units to be easily moved along – between services if necessary!

The real key to the system is the patent pending Magneeto™ 2. This trivet-like device is used on the upper surface of the countertop to locate the heat zone (a red LED flashes.)

Model Number	MB062-U
Power requirements	220 - 240 V, 1 PH
Power consumption	650 W
Voltage	200 - 240 V 50-60 Hz
Preset Temperatures	150, 160, 175, 190°F / 65, 70, 80, 85°C
Additional Temperature Settings Range	80 - 190°F 27 - 88°C
Amperage	2.7 amps
Dimensions (mm)	391 x 387 x 127H
Weight	6.8 kg
